EXPERIENCE AND PROJECTS

CoreTeams Softech Pvt. Ltd, Jaipur (Frontend Developer)   June '2025 – Present   **Full Time**
- Working as a **full-time Frontend Developer**, leading the **frontend team** and driving development across multiple client and in house projects.
- Managing **frontend architecture**, code quality, task delegation, and ensuring smooth collaboration between designers, backend teams, and QA.
- Leading deployment processes and handling **code deployments on development and testing environments**, ensuring stability, proper versioning, and error-free releases.
- Building scalable and high-performance UIs using modern frontend technologies like **React.js, Vite.js, Next.js, Tailwind CSS and Chakra UI**.
- Optimizing user interfaces for responsiveness, accessibility, and performance across different screens and devices.

Celebal Technologies, Jaipur (Power BI)   June '2024 – August '2024   **Internship**
- Learnt about various data Analytics and Power BI from deep perspective and their applications
- Learnt about dashboards and behind working of tools with their implementations using Microsoft Power BI

JEE1 Platform (Medical Supply Chain) – Frontend Developer July'25 - Present   **Project (Company)**
- Worked as part of the company's development team on **JEE1**, a healthcare supply-chain platform built for **manufacturers, distributors, and retailers** to manage products, orders, and inventory efficiently.
- Took ownership of the **entire frontend development**, including role-based dashboards, order workflows, product management screens, and real-time data views across all user panels.
- Implemented responsive UI components, optimized navigation flows, and integrated API responses to provide real-time data visibility for stock levels, order status, product listings, and pricing information.
- Ensured consistency in design, performance optimization, and error-handling across all panels to deliver a seamless multi-role user experience within the medical supply-chain ecosystem.
- Implemented **Socket.io** on the frontend to enable **real-time notifications**, handling events such as new order alerts, order status updates, stock warnings, and system messages tailored to each user role.

Win11 Fantasy Dashboard (Next.js, React.js, Tailwind CSS) Jun'2025 - Sep'2024   **Project (Company)**
- Developed a **real-time user overview panel** showing wallet balance, contest participation, upcoming matches, and recent activity.
- Implemented **live match cards and fantasy statistics**, enabling users to track players, teams, and performance analytics directly from the dashboard.
- Created modules for **contest management**, including joining contests, viewing prize pools, checking rankings, and tracking live score progress.
- Added **notification and alert systems** for contest updates, match reminders, player news, and important fantasy-related events.
- Used optimized components, reusable layouts, and smooth navigation to enhance overall speed, user flow, and dashboard interactivity.

E-Learning App (React Native)   May'24 – Oct'2024   *Project*
- Integrating HyGraph for efficient data management.
- Allow users to register, login, and manage their profiles. You can integrate social logins for convenience with help of clerk.
- Provide a searchable and categorized course catalog for easy browsing and discovery.

SKILLS AND EXPERTISE

- **Programming Languages: Javascript, HTML, CSS, MySQL,**
- **Frameworks and Libraries: Next.js, React.js, Vite.js, React-Native, Chakra UI, ShadCn UI, Tailwind CSS**
- **Operating System: Windows, Linux etc.**
- **Software: Visual Studio Code, Docker, Git & GitHub, Putty, Xampp Server, Microsoft Office, Expo, Hygraph, Clerk**

CERTIFICATIONS

Duke University | Programming Fundamentals   May'22 - Decl'22
- Participated to unlock professional potential and master programming skills for career success.

NPTEL | Public Speaking   Nov'22 – April'23
- This course is being conducted by IIT Roorkee and still the progress of bringing it to its end.

KnowledgeGate | React and Redux   Oct'21
- An exclusive course offered by knowledge gate on basics and fundamentals of React and redux.

Great Learning | Data Structure in python   May'23
- This course was offered by great learning on basics and fundaments of Data Structures.
